PROJECT TITLE:

---

1. Problem Statement:

(This section explains the need to improve the visual appearance of the event registration page created in Assignment-1 using CSS for better layout and user experience.)

---

2. Objective:

(This section describes the goal of the assignment, which is to apply CSS styling to transform the basic HTML page into a clean and professional-looking interface.)

3.Requirements:

(This section lists all the styling tasks that must be implemented using CSS.)

3.1 Apply Global Styling:

(Apply overall styles to the entire webpage including background, font, spacing, and text alignment to ensure a consistent design.)

3.2 Style the Event Title and Description:

(Enhance the appearance of the event heading and description using font size, color, spacing, and alignment to make them visually prominent.)

3.3. Design the Event Information Section

(*Improve the layout and readability of the event details section by adding borders, spacing, background colors, and proper alignment.*)

3.4 Enhance the Registration Form Layout:

(Style the registration form using a card layout with borders, padding, rounded corners, and shadow effects to improve presentation.)

3.5 Style Fieldsets and Legends:

(Improve the appearance of fieldsets and legends by adding borders, spacing, background highlights, and bold text styling.)

3.6 Improve Input Elements:

(Apply consistent styling to textboxes, dropdowns, radio buttons, checkboxes, file upload fields, and textarea elements. Add focus effects for better user interaction.)

3.7 Button Styling:

(Design attractive Submit and Reset buttons using background colors, padding, hover effects, rounded corners, and transitions.)

3.8 Style the Participants Table:

(Enhance the table by adding borders, header background color, alternate row styling, and hover effects for better readability.)

3.9 Style the Declaration Section:

(Align the declaration checkbox properly and add spacing to make it clear but visually balanced within the form.)

3.10 Footer Design:

(Style the footer with background color, center alignment, padding, and proper spacing to clearly display contact information.)

4.CSS Concepts Used:

(Mention the CSS concepts applied in the project such as selectors, box model, colors, typography, spacing, borders, shadows, hover effects, and table styling.)

---

5. Implementation Steps:

(Explain the step-by-step process followed to apply CSS styling to the HTML page.)

6.Output:

(Attach screenshots of the fully styled webpage, including the form, table, and footer, to demonstrate the final output.)

7.Learning Outcome:

(Explain the skills and understanding gained about CSS styling, layout control, and presentation design.)

---

8. Conclusion:

(Summarize how the HTML page was successfully enhanced using CSS to improve appearance and user experience.)
